power bank charger for mobile

- **Credit Card Size:** Our MC5 power bank charger for mobile is freshly launched in 2015 by Artist of Spain and make private tooling in China. After researching demand trend of electronics products, we decided to create new credit card power bank with cool design.
- **Matte surface:** Super soft rubber oil coated to body of business power bank makes our product cute and matte feeling when touching it. Luxury package box is matched to different design, which provides unique appearance to high end customers.
- **Popular design:** all our designs are created in Europe, hundreds of unique artwork are optional and gift boxes are matched to each artwork. We presented our power bank to end users or promotional customers for amazing shock when first eyes to see it.
- **Free to Customize:** we can print company logo, words and custom design on surface of power bank charger for mobile, even personalized photo can be printed also without MOQ.

# Product Parmeter

Model:	MC5 Power Bank
Battery Type:	Li-Poly
Capacity:	5000mAh
Input:	5V-2A
Output:	5V-2.1A
Size:	93mm x 63mm x 12mm
Weight:	100g

<b>Product name:</b>	<b>5000mAh power bank</b>
color:	Black / customize
size:	93*63*12mm (credit card size)
Input:	5V (DC) 2A
Output:	5V (DC) 2.1A

Capacity:	5000mAh
Battery:	Top Grade A Li Polymer Rechargeable Battery
Life cycle:	500 times
conversion rate	≥75%
LED indicator:	Four LED to show capacity
reset	Reset when recharge it
work temperature:	0°C~45°C
environment temperature:	-25°C~85°C
humidity:	20-95 RH% (40°C)
accessory	Micro USB cable, user manual, power bank

# FAQ

1. What is the difference between 18650 and Li Polymer

A: - 18650 size and dimension are fixed, Li Polymer is flexible and customized.

- 18650 is more danger when met heating or impacted, Li Polymer is safer.
- 18650 battery durability will drop faster, Li Polymer battery capacity is more durable
- 18650 is cheaper cost comparing to Li Polymer.

2. What is common capacity in 18650 battery?

A: Commonly factory of batteries are always produced 2000mah, 2200mah, 2400mah and 2600mah Li Ion battery. However, some famous brands power bank ratings such as Samsung or Panasonic power bank business are supplying higher capacity, such as 2800mAh 3000mAh 3500mAh although they are higher cost.

3. Is it true that branded power bank will never explode and generic power bank will explode?

A: Any wrong operation leads to battery such as short circuit, over heating would be danger to explode, no matter brands power bank ratings or generic power bank. Good quality and strictly quality control would be vital to safety products.

4. What artwork requirements if customize design or logo?

A: Normally Ai, PSD or eps format documents are required. For logo printing or engraving, the logo image or text must be provided as a vector file which retains its high resolution.

5. What certification do you pass based on your power bank?

A: Most of our power bank were sold to Europe market and USA market. The main marketing channel is shopping mall and super markets, such as Media Markt, Dixson, Aldi. Such customers request very fastidious to our products. We must pass CE EMC FCC, Rohs Reach SCCP GS Phthalate certifications.
