FAQ

Q:How about the order turnaround time?

A:It depends on your order quantity and requirement. Usually we can make shipment in 3-5 days after payment and delivery via curier took 3 -5 days. We also have plenty of stock for many models. Please check with our account manager for more details and mare sure your requirement can be met.ortable bank charge best external battery

Q:Why is your company dealing with so few kinds products/

A:In it is our business philosophy. We only develop our own products through cooperate with our customers after fully analysis markets every year. Our products are targeting to meet medium and high level marketing with good quality and best design. If some customers prefer lower quality and cheapest price, maybe we failed to meet them.

Q:What is it?

A:We introduce you the mobile charger with the most original design. With this portable battery USB cable included, you will be able to charge your Smartphone anywhere you go and you will never run out of phone battery again.

Q:How can I recharge the battery?

A:The input connector supports up to 1A of power and allows you to recharge the battery of the mobile charger about 1-2 hours when plug it to wall charger or in 2-3 hours when plug to laptop.

Q:How many times can I charge my phone?

A:The recharging times to your mobile phone depends on the capacity of your battery (mAh) and the efficiency(it varies depending on the model of the mobile charger and the type of device).Normally 75% capacity of power bank can output to your phone because power lost by cable and PCBA.
